SUMMARY

I am currently pursuing my B.Tech in Computer Science and Engineering, with a strong focus on practical, project-based learning.

Throughout my academic journey, I've worked extensively with Python, Web dev and blockchain technologies, building a diverse portfolio of projects.

WORK EXPERIENCE

AI Intern

Jun 2025 - Sept 2025

At EONMED (NOIDA)

- Gaining practical experience in AI and related projects
- Build computer vision, tts stt related projects

Software Developer Intern

Sept 2025 - Nov 2025

Appinventiv Technologies Pvt. Ltd.

- Worked as a Full Stack Developer, contributing to the enhancement and development of web applications based on client requirements. Responsibilities included integrating chatbot solutions, implementing new features, and optimizing existing functionalities.
- Developed key projects such as an organic vegetable e-commerce platform and an ERP system for coaching institutes, ensuring scalability and user-friendly design.

PROJECTS

Virtual Heart Rate Monitor

- This project uses **pyVHR** and **MediaPipe** to estimate and **visualize heart rate (BPM)** from facial videos, using computer vision and signal processing.
- It tracks facial landmarks with **MediaPipe**, extracts physiological signals using **pyVHR**, and **overlays real-time BPM values** on the video for intuitive visualization.
- **Project Link** - <https://github.com/23F3003917/Virtual-Heart-Rate-Monitor>

QUIZ - MASTER

- It is a multi-user app (one requires an administrator and other users) that acts as an exam preparation site for multiple courses.
- **TechStack** - Python, Flask, Jinja 2, SQLite, HTML, CSS
- **Project Link** - <https://drive.google.com/file/d/1lQbeuGclAKxJ1wvUA0ICyNNFISZDI4P6/view?usp=sharing>

Vid-Vision

- Vid - Vision solves the problem of expensive **motion capture** by offering an affordable, software-based solution that uses just a phone or webcam.
 - **It converts video into detailed body and hand landmark data, enabling real-time tracking and animation without costly hardware.**
 - **Project Link** - <https://devfolio.co/projects/vidvisiond-ac20>
-

Face Recognition Attendance Management

- The system uses your webcam to **detect and recognize faces in real time**, verifying both **face and voice liveness**. When a registered user is identified, it automatically logs their name and timestamp in an attendance file — saved in a **structured CSV format** for easy Excel export.
 - **Project Link** - <https://github.com/23F3003917/Face-Recogn-Attendance-Sys>
-

EDUCATION

IMS Engineering College B.Tech. - CSE(AIML) SGPA : 7.9/10	2022-2026
IT Madras - Department of Management Studies BSc Online Degree CGPA : 7.20 / 10	2023-2026
KCM School, Moradabad 10th CBSE Percentage: 87.40% 12th CBSE Percentage: 75.9%	2019-2022

TECH - SKILLS

- **Python Development** (Flask , Jinja2, RestfulAPI)
- HTML& CSS
- **Web Development** (React + Vue.js)
- Computer Vision
- **Model Training** - Tensorflow , PyTorch
- Unity3D
- **Databases** - SQLite , MYSQL

SOFT - SKILLS

- Leadership
 - Teamwork
 - Critical Thinking
 - Effective Communication
-

ACHIVEMENTS

- IIT Madras Data Science Foundational Level
- IITM Data Science Diploma Level
- Hackathons Finalist
